

Assignment-2

Python Code for Temperature and Humidity

Coding:

```
Temperature=85
```

```
Humidity=90
```

```
If temperature>=80:
```

```
    If humidity>=90:
```

```
        Print("its not humid")
```

```
        Print('buzzer on')
```

```
Else:
```

```
    Print("its hot but not humid")
```

```
Else:
```

```
    Print("its not humid")
```

Output:

Its hot and humid

Buzzer on
